Rethinking Democracy and the European Union Erik Oddvar Eriksen, John Erik Fossum. 2013-06-17 While the Lisbon treaty was meant to clarify the European Union's role and political identity, it remains a challenge for politicians and decision-makers to define. *Rethinking Democracy and the European Union* looks at both the concept of the EU as a political system, and analyses the meaning and status of democracy in Europe today. This book draws upon leading scholars and practitioners from the RECON project (Reconstituting Democracy in Europe) to frame and analyse a range of institutional realms and policy fields, including constitutionalisation, representative developments, gender politics, civil society and public sphere, identity, and security and globalisation. Drawing together these strands, the book questions whether EU politics require a new theory of democracy, and evaluates the relationship between union and state, and the possible future of post-national democracy. Lucid and accessible, this book is at the forefront of the intellectual debate over the character of the EU, presenting research, theory and analysis on a critical political issue of our time. *Rethinking Democracy and the European Union* will be of interest to students and scholars of democracy, European Union politics and international relations.

Values - Politics - Religion: The European Values Study Regina Polak, Patrick Rohs. 2023-07-18 This open access book analyses the international data of the European Values Study (EVS 1990 - 2017), with a focus on the impact of religious on political values from empirical as well as theoretical perspectives, i.e. sociology, political and cultural studies, philosophy, ethics, theology and the law. It interprets results from interdisciplinary perspectives, including the viewpoints of social ethics, sociology and cultural studies, law and practical theology. In the political and public as well as media debates of the European Union, the recourse to (above all European and also Christian) values has played a central and controversial role in the field of politics and religion for several decades. This collection is a contribution to a qualified discourse on values in Europe by providing empirical, hermeneutical and ethical criteria for a responsible use of the concept of values. In addition to a comparison of political value systems in Western and Eastern Europe and the possible role of religion in this context, the book also deals with topics such as, f.i., solidarity, economics and values, value formation, and law and values. Additionally,

specific population groups such as the socio-culturally marginalized strata are examined more closely. Besides current scientific analyses and interpretations of interest to researchers from various disciplines, this book also offers valuable impulses and suggestions for various multipliers in political, civil society and religious organisations, as well as a sound overview for graduate students.

Where Are Our Boys? Martin Woods.2016-08-01 In 1914, the newspaper map or newsmap began to supply readers with the geographical backdrop to the Great War, an important tool in explaining the progress of the war to the public at home. Day by day, for every campaign and battle, readers across the nation were deluged with maps, both in the pages of newspapers and pasted up in town and city streets, allowing them to follow Australian and Allied exploits. Drawn from scant news cables, out of date cartography, and the writer's imagination, a semi-fictional war story emerged, of ANZAC successes and, sometimes, disasters. Our boys were in Egypt, Palestine, Gallipoli, Belgium, Germany and France, in towns and villages most Australians had never heard of. Soon, these places were being discussed, with growing expertise, over maps in homes, pubs, churches and clubs. Those following the war at home were never allowed too close, as censorship rules dictated when maps could be published. Yet 'Where Are Our Boys?' is not simply about propaganda. Maps in newspapers tracked the war's many campaigns and the exploits of our boys, but most importantly allowed those at home to feel close to their brothers, husbands, fathers, uncles, neighbours and cousins. Maps naturally became central to commemorating events, people and places. The war produced more maps than any time before in history, giving us along the way some of the most beautiful, and sometimes misleading, maps ever published. 'Where Are Our Boys?' tells the story of how the war was fought and won from the opening salvos in 1914 to Gallipoli and victory on the Western Front. In the end, though, these maps were needed most to help understand the conflict and to comprehend the great human costs.

Global Trends 2040 National Intelligence Council.2021-03 The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come. -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Addressing Hybrid Threats Luigi Lonardo.2024-02-12 Combining rich theoretical analysis with real-world examples, this erudite book navigates EU law in the context of hybrid threats, examining how security issues affect themes of constitutional law at the heart of a democratic system. Presenting doctrinal and historical insights, the book not only considers the different types of hybrid threats, but also how they are increasingly showing that traditional understandings of security risk are becoming obsolete.

Routledge Revivals: Regional Development in Western Europe (1975) Hugh Clout.2017-11-22 First published in 1975, this book provides a straightforward examination of regional differences and regional development in the countries of Western Europe. Professor Clout divides this into two parts. The first examines a series of themes with reference to the whole of Western Europe, and the second part discusses regional development in individual countries or groups of countries. Contributions by experts from the UK and from mainland Europe present an essentially geographic approach, combining thematic and country-by-country discussions.

Strengthening Forensic Science in the United States National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community. 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The European Union Kristin Archick. 2019-09-15 The European Union (EU) is a political and economic partnership that represents a unique form of cooperation among sovereign countries. The EU is the latest stage in a process of integration begun after World War II, initially by six Western European countries, to foster interdependence and make another war in Europe unthinkable. The EU currently consists of 28 member states, including most of the countries of Central and Eastern Europe, and has helped to promote peace, stability, and economic prosperity throughout the European continent. The EU has been built through a series of binding treaties. Over the years, EU member states have sought to harmonize laws and adopt common policies on an increasing number of economic, social, and political issues. EU member states share a customs union; a single market in which capital, goods, services, and people move freely; a common trade policy; and a common agricultural policy. Nineteen EU member states use a common currency (the euro), and 22 member states participate in the Schengen area of free movement in which internal border controls have been eliminated. In addition, the EU has been developing a Common Foreign and Security Policy (CFSP), which includes a Common Security and Defense Policy (CSDP), and pursuing cooperation in the area of Justice and Home Affairs (JHA) to forge common internal security measures. Member states work together through several EU institutions to set policy and to promote their collective interests. In recent years, however, the EU has faced a number of internal and external crises. Most notably, in a June 2016 public referendum, voters in the United Kingdom (UK) backed leaving the EU. The pending British exit from the EU (dubbed Brexit) comes amid multiple other challenges, including the rise of populist and to some extent anti-EU political parties, concerns about democratic backsliding in some member states (including Poland and Hungary), ongoing pressures related to migration, a heightened terrorism threat, and a resurgent Russia. The United States has supported the European integration project since its inception in the 1950s as a means to prevent another catastrophic conflict on the European continent and foster democratic allies and strong trading partners. Today, the United States and the EU have a dynamic political partnership and share a huge trade and investment relationship. Despite periodic tensions in U.S.-EU relations over the years, U.S. and EU policymakers alike have viewed the partnership as serving both sides' overall strategic and economic interests. EU leaders are anxious about the Trump Administration's commitment to the EU project, the transatlantic partnership, and an open international trading system-especially amid the Administration's imposition of tariffs on EU steel and aluminum products since 2018 and the prospects of future auto tariffs. In July 2018, President Trump reportedly called the EU a foe on trade but the Administration subsequently sought to de-escalate U.S.-EU tensions and signaled its intention to launch new U.S.-EU trade negotiations. Concerns also linger in Brussels about the implications of the Trump Administration's America First foreign policy and its positions on a range of international issues, including Russia, Iran, the Israeli-Palestinian conflict, climate change, and the

role of multilateral institutions. This report serves as a primer on the EU. Despite the UK's vote to leave the EU, the UK remains a full member of the bloc until it officially exits the EU (which is scheduled to occur by October 31, 2019, but may be further delayed). As such, this report largely addresses the EU and its institutions as they currently exist. It also briefly describes U.S.-EU political and economic relations that may be of interest.

The Changing Face of Europe Bülent Kaya.2002-01-01 This study examines all aspects of migration, its different flows and types, such as economic, forced and ethnic, as well as its impact on economics, demography and social and cultural life. National policies on integration and naturalisation, and how they are conditioned are examined and compared. From a variety of sources (maps, statistics, first person accounts of migration life, novels, films and surveys), a web of causes and effects emerges, depicting migrant life today. In this way, the reader gains an overview and the beginning of a deeper understanding of this complex subject.

The Legacy of the Global Financial Crisis Youssef Cassis, Jean-Jacques van Helten.2021-08-12 Much has been written on the financial crisis of 2008 - the most severe economic downturn since the Great Depression - analysing its causes and the risks for the future of the global economy. This book takes an alternative approach which focuses on the legacy of the global financial crisis, what is remembered and what lessons have been drawn from it. This volume provides perspectives on this legacy from a variety of contributors including central bankers, regulators, politicians, academics, and journalists. They offer insight into what remains of the crisis in terms of public and industry awareness, changes to the post-2008 financial architecture, lessons from the national experiences of highly exposed small economies, and considers this legacy in terms of oversight by regulatory regimes. These diverse perspectives are drawn together here to ask how we can ensure that these lessons will be transmitted to the new generation of global financiers.

Representing Place and Territorial Identities in Europe Tiziana Banini,Oana-Ramona Ilovan.2021-03-16 This book provides insight into the topic of place and territorial identity, which involves both the dimension of collective belonging and the politics of territorial planning and enhancement. It considers the social, economic and political effects of territorial identity representations among others in terms of mystification, spatial fetishism, and the creation of place and territorial stereotypes. A mixed methodology is employed to research case studies at diverse territorial scales which are relevant to the impact of a variety of factors on place/territorial identity processes such as migration, political and economic changes, natural disasters, land use changes, etc. Visual imagery, constructing visual discourses and living within visual cultures are placed in the foreground and refer to among others the changes and challenges introduced by the Internet and social networks in place/territory representations and self-representations; identity politics and its impact on place/territorial identity representations; discourses in shaping representations and self-representations of territorial/place-based identities related to collective memory, cultural heritage, invented tradition, imagined communities and other key notions.

The Fate of Political Scientists in Europe Giliberto Capano,Luca Verzichelli.2023-04-13 This open access book offers a systematic survey of the attitudes and values of European political scientists. It builds a structural interpretation based on empirical data, as well as offering reflections on the future structure of the discipline. In the middle of a delicate phase of changes marked by the effects of pandemic and the war in Ukraine, we need to pay attention to the factors that are affecting not only the 'objects' of Political Science as a discipline but also its interactions with the world around it. First, this book asks to what extent the work of European political scientists is impacted by the current change. Second, their attitudes and predisposition about the future goals of the discipline are analysed. In the final chapter, the authors seek to understand to what extent a diffuse but still not completely institutionalized academic discipline will be able to produce a comprehensive impact around the European society, in order to be more visible and effective in policy making and policy processes.
