Deep Jungle Fred Pearce.2010-10-31 DEEP JUNGLE is an exploration of the most alien and feared habitat on Earth. Starting with man's earliest recorded adventures, Fred Pearce journeys high into the canopy - home to two-thirds of all the creatures on our planet, many of whom never come down to earth. During his travels he encounters all manner of fantastic flora and fauna, including a frog that can glide from tree to tree, a spider that can drag live chickens into its burrow and a flower that smells of decaying flesh. It is in the jungle that Pearce discovers secrets about how evolution works, the intricate links that connect us all, and maybe even clues to where humans came from - here is the key to our future foods and medicines, our climate and our understanding of how life works. At the start of a new millennium Pearce asks why we continue to waste precious time - and billions of dollars - looking for signs of life elsewhere in our universe when the greatest range of life-forms that have ever existed lies right here on our doorstep. Today environmentalists say we are on the verge of destroying the last rainforests, and with them the planet's evolutionary crucible, and maybe even its ability to maintain life on Earth. But nature has a way of getting its own back. The Mayans and the people of Angkor went too far in manipulating nature and paid the ultimate price. Their civilisations died and the jungle returned. Nature reclaimed it's own and it may do so again ...

How Come? Kathy Wollard.2015-01-13 Fact-filled, fun-filled, as interesting to parents as it is to kids, the *How Come?* series is the trusted source for lively, clear answers to kids' science queries. Now the best questions and answers from all three books—*How Come?*; *How Come? Planet Earth*; and *How Come? In the Neighborhood*—have been revised, updated, freshly illustrated in full color, supplemented with twenty completely new questions, and combined into one bigger, better volume. *How Come?* explains, in fascinating detail, more than 200 mysteries and phenomena in the world around us. These are the questions that pique kids' curiosity—and stump parents. When it rains, does running (rather than walking) to the nearest shelter really keep you any drier? How can a stone skip across a pond (instead of sink)? If the Earth is spinning, why can't we feel it? Why don't we fly off? Why do elephants have trunks? And the all-time classic, Why is the sky blue? (Sunlight has a hidden rainbow of colors, and air molecules scatter blues the most—sending bright blue light down to Earth.) The text is clearly written, engaging, and accessible. It's for every kid who wants to know—and every grown-up who simply doesn't know.

Panda Love .2018-06-05 Panda Love is a collection of incredible images of these gentle giants. Ami Vitale's stunning photographs, taken on location in China, document the efforts to breed pandas and release them back into the wild. Ami was given unprecedented access to the pandas and her photos give an amazing insight into the bears' lives in both the sanctuaries and their natural habitat. Fluffy panda cubs tumble out of baskets and play hide-and-seeK with their carers, while the adult pandas curiously explore the forest and climb trees. The giant panda is everyone's favorite bamboo-munching bear. China may be on its way to successfully saving its most famous ambassador, and Panda Love lovingly documents the process of putting the wild back into an icon.

A National Parenting Product Awards (NAPPA) winner! Scanimation is a state-of-the-art animation process that creates the illusion of movement in each picture. In terms kids can relate to, it's like a video without a screen. ABC Animals presents the alphabet as it's never been seen before. In a romping, stomping journey from A to Z, watch the Alligator snap, the Bats swooping, the Camel trot. There's L for the Lion proudly prowling along, and M for the Mouse scurrying inside his wheel. And it all culminates in the largest Scanimation image yet: Z, for Zoo, where all the animals gather to play. Each page is a marvel that brings animals, along with one shining star, to life with art that literally moves. It's impossible not to flip the page, and flip it again, and again, and again.

Or the Aye-Aye, whose name means I don't know in Malagasy because no one wants anything to do with this bad-luck creature. Others sound like an inside joke: It's easy to figure out what was on the taxonomist's mind when he christened a fly he discovered Pieza Pie. Along the way you'll learn all about these curiously named animals' just-as-curious habits, appearances, and abilities.

Parable, myth, science-fiction, eco-horror, My Volcano is a radical work of literary art, emerging as a subversive, intoxicating artistic statement by John Elizabeth Stintzi. On June 2, 2016, a protrusion of rock growing from the Central Park Reservoir is spotted by a jogger. Three weeks later, when it finally stops growing, it's nearly two-and-a-half miles tall, and has been determined to be an active volcano. As the volcano grows and then looms over New York, an eight-year-old boy in Mexico City finds himself transported 500 years into the past, where he witnesses the fall of the Aztec Empire; a Nigerian scholar in Tokyo studies a folktale about a woman of fire who descends a mountain and destroys an entire village; a white trans writer in Jersey City struggles to write a sci-fi novel about a thriving civilization on an impossible planet; a nurse tends to Syrian refugees in Greece while grappling with the trauma of living through the bombing of a hospital in Kunduz, Afghanistan; a nomadic farmer in Mongolia is stung by a bee, magically transforming him into a green, thorned, flowering creature that aspires to connect every living thing into its consciousness. With its riveting and audacious vision, My Volcano is a tapestry on fire, a distorted and cinematic new work from the fiercely talented John Elizabeth Stintzi.

The Lay of the Land Joe Greer.2022-05-10 A spiritually uplifting and beautiful designed visual memoir by the hugely popular photographer on Instagram, Joe Greer, combining thoughtful essays and more than 100 gorgeous landscape photos—half fan favorites, and half never-before-seen. “Each photograph really does come down to a split second when you

decide to freeze that moment in time. . . . You ask yourself what the story is that you want to tell, and let the rest unfold: Click.”—from the introduction Joe Greer never imagined he would become a photographer. Raised in Florida by an aunt and uncle after his mother’s death when he was four, Joe had a seemingly normal childhood, spending summers at church camp and dreaming of going to college. But nearly fifteen years later, the ground shifted beneath his feet when he discovered a family secret that would impact the rest of his life. Trying to make sense of that revelation and what it meant for his future, Greer set his sights on becoming a pastor at Spokane’s Moody Bible Institute. There, he discovered Instagram—and a passion for photography. His pictures of the lush, wild beauty of the Pacific Northwest landscape attracted a large following that has grown to more than three quarters of a millions fans and continues to expand. The Lay of the Land is Joe’s story in words and pictures. In this stunning compendium, he reflects on the trauma of his early life and what photography has taught him: how to find his light; how to slow down; how to appreciate the world around him, a reverence for the nature world that that both nurtures and amplifies his creativity and faith; how to love—his photography led him to his wife, Madison—and how to heal. For Joe, photography has been a way to find purpose, better understand his faith, and express himself. Though he began with landscapes, meeting his wife sparked a new love of portraiture, and he turned to making photos of street scenes that explored his complicated feelings about family. A love letter to the natural world, to faith, and to finding your calling in the most unexpected places, The Lay of the Land is a window into the beautiful mind and heart of one of the internet’s favorite photographers. Moving and inspiring, it is a creative and spiritual journey that offers lessons on life and living. As Greer reminds us all, whatever it is you want, it’s up to you to make the moment (and the photograph).

In this spectacular, full-colour coffee table book, author and photographer David Rogers journeys to more than 40 different camps in South Africa, Namibia, Botswana, Mozambique, Zambia, Zimbabwe, Tanzania, Kenya, Rwanda and Uganda. Classics includes some of the great characters of the safari world among them Robin Pope of Robin Pope Safaris who is one of the greatest walking gUides of Southern Africa. David also interviews Stefano Cheli and Aris Grammaticas who are founding members in East Africa. Selinda Camp, which is owned by National Geographic filmmakers and photographers Derek and Beverly Joubert, is also among the line up of Classic Camps. When Classics started, all of the camps were canvas or very traditional in design -and while some of them have developed a bit since and become very stylish and in some cases extremely luxurious, they retain the simplicity of form and authenticity. You never feel removed from the natural splendour of the environment in which they are situated.
