Public Relations David Guth, Charles Marsh. 2016-07 This textbook provides an introduction to the dynamic, growing and honourable profession of public relations as it relates to the broader social context. Grounded in public relations theory and traditions, it contains lively anecdotes and is written in an informal style. A values-focused introduction to public relations Grounded in public relations theory and traditions, *Public Relations: A Values-Driven Approach* provides an introduction to the public relations profession as it relates to a broader social context. Each chapter helps students understand how public relations activities reflect and affect an organization's core values. MySearchLab is a part of the Guth/Marsh program. Research and writing tools, including access to academic journals, help students understand critical thinking in even greater depth. To provide students with flexibility, students can download the eText to a tablet using the free Pearson eText app. Note: MySearchLab does not come automatically packaged with this text. Astrobiology: Future Perspectives P. Ehrenfreund, W.M. Irvine, T. Owen, Luann Becker, Jen Blank, J.R. Brucato, Luigi Colangeli, Sylvie Derenne, Anne Dutrey, Didier Despois, Antonio Lazcano, Francois Robert. 2006-03-05 Astrobiology, a new exciting interdisciplinary research field, seeks to unravel the origin and evolution of life wherever it might exist in the Universe. The current view of the origin of life on Earth is that it is strongly connected to the origin and evolution of our planet and, indeed, of the Universe as a whole. We are fortunate to be living in an era where centuries of speculation about the two ancient and fundamental problems: the origin of life and its prevalence in the Universe are being replaced by experimental science. The subject of Astrobiology can be approached from many different perspectives. This book is focused on abiogenic organic matter from the viewpoint of astronomy and planetary science and considers its potential relevance to the origins of life on Earth and elsewhere. Guided by the review papers in this book, the concluding chapter aims to identify key questions to motivate future research and stimulate astrobiological applications of current and future research facilities and space missions. Today's rich array of new spacecraft, telescopes and dedicated scientists promises a steady flow of

discoveries and insights that will ultimately lead us to the answers we seek.

Foundations of Sensation and Perception George Mather.2016-08-12 Do you wonder how movies – sequences of static frames – appear to move, or why 3-D films look different from traditional movies? Why does ventriloquism work, and why can airliner flights make you feel disoriented? The answers to these and other questions about the human senses can be found within the pages of *Foundations of Sensation and Perception*. This third edition maintains the standard for clarity and accessibility combined with rigor which was set in previous editions, making it suitable for a wide range of students. As in the previous editions, the early chapters allow students to grasp fundamental principles in relation to the relatively simple sensory systems (smell, taste, touch and balance) before moving on to more complex material in hearing and vision. The text has been extensively updated, and this new edition includes: a new chapter devoted to attention and perception over 200 new references over 30 new figures and improved, more colorful, visual presentation a new companion website with a range of resources for students and lecturers The book contains a range of pedagogical features, including tutorial sections at the end of each chapter. This distinctive feature introduces areas of the subject which are rarely included in student texts, but are crucial for establishing a firm foundation of knowledge. Some tutorials are devoted to more advanced and technical topics (optics, light measurement, Bayesian inference), but treated in an accessible manner, while others cover topics a little outside of the mainstream (music perception, consciousness, visual art). *Foundations of Sensation and Perception* will enable the reader to achieve a firm grasp of current knowledge concerning the processes that underlie our perception of the world and will be an invaluable resource for those studying psychology, neuroscience, and related disciplines.

Singer and the Sewing Machine Ruth Brandon.1977 Women, booze, illegitimate children, fraud, bigamy, 19th-century capitalism, and the emergence of an empire These words describe the life of Isaac Merritt Singer. Although widely regarded as the inventor of the sewing machine, Singer actually modified an existing machine and marketed it to an America eager for the new tools of the Machine Age. His genius was in the advertising, service with a smile, installment plans, and marketing gimmicks he used to get the sewing machine in homes and sweatshops all over the world. This fascinating and detailed biography provides an insightful and provocative look at the American entrepreneur, unraveling a complex web of personal ambition, fame, fortune, and the attainment of the American Dream.
