#### **Standards for Internal Control in the Federal Government** United States Government Accountability

Office, 2019-03-24 Policymakers and program managers are continually seeking ways to improve accountability in achieving an entity's mission. A key factor in improving accountability in achieving an entity's mission is to implement an effective internal control system. An effective internal control system helps an entity adapt to shifting environments, evolving demands, changing risks, and new priorities. As programs change and entities strive to improve operational processes and implement new technology, management continually evaluates its internal control system so that it is effective and updated when necessary. Section 3512 (c) and (d) of Title 31 of the United States Code (commonly known as the Federal Managers' Financial Integrity Act (FMFIA)) requires the Comptroller General to issue standards for internal control in the federal government.

Windle, 2008-08-23 Around the world, SCADA (supervisory control and data acquisition) systems and other real-time process control networks run mission-critical infrastructure--everything from the power grid to water treatment, chemical manufacturing to transportation. The respective co-authors are among the leading experts in the world capable of addressing these related-but-independent concerns of SCADA security. Headline-making threats and countermeasures like malware, sidejacking, biometric applications, emergency communications, security awareness planning, personnel & workplace preparedness and bomb threat planning will be addressed in detail in this one of a kind book-of-books dealing with the threats to critical infrastructure protection. They collectively have over a century of expertise in their respective fields of infrastructure protection. Included among the contributing authors are Paul Henry, VP of Technology Evangelism, Secure Computing, Chet Hosmer, CEO and Chief Scientist at Wetstone Technologies, Phil Drake, Telecommunications Director, The Charlotte Observer, Patrice Bourgeois, Tenable Network Security, Sean Lowther, President, Stealth Awareness and Jim Windle, Bomb Squad Commander, CMPD. Internationally known experts provide a detailed discussion of the complexities of SCADA security and its impact on critical infrastructure Highly technical chapters on the latest vulnerabilities to SCADA and critical infrastructure and countermeasures Bonus chapters on security awareness training, bomb threat planning, emergency communications, employee safety and much more Companion Website featuring video interviews with subject matter experts offer a sit-down with the leaders in the field
